

# DbProperty Descriptor Element

A dbproperty element defines a BerkeleyDB configuration property for a [Freeze](#) database environment.

This element may only appear as a child of a [dbenv](#) element.

The following attributes are supported:

Attribute	Description	Required
name	The name of the configuration property.	Yes
value	The value of the configuration property. If not defined, the value is an empty string.	No

Here is an example to demonstrate the use of this element:

## XML

```
<dbenv name="MyEnv" home="/opt/data/db">
    <description>A description of the database environment.</description>
    <dbproperty name="set_cachesize" value="0 52428800 1"/>
</dbenv>
```
