

IceGrid-NodeDynamicInfo

IceGrid::NodeDynamicInfo

Overview

struct NodeDynamicInfo

Dynamic information about the state of a node.

Used By

- [IceGrid::NodeDynamicInfoSeq](#)
- [IceGrid::NodeObserver::nodeUp](#)

Data Member Index

[info](#) — Some static information about the node.

[servers](#) — The dynamic information of the servers deployed on this node.

[adapters](#) — The dynamic information of the adapters deployed on this node.

Data Members

[IceGrid::NodeInfo](#) info;

Some static information about the node.

[IceGrid::ServerDynamicInfoSeq](#) servers;

The dynamic information of the servers deployed on this node.

[IceGrid::AdapterDynamicInfoSeq](#) adapters;

The dynamic information of the adapters deployed on this node.
