

IceGrid-DistributionDescriptor

IceGrid::DistributionDescriptor

Overview

["cpp:comparable"] struct DistributionDescriptor

A distribution descriptor defines an IcePatch2 server and the directories to retrieve from the patch server.

Used By

- [IceGrid::ApplicationDescriptor::distrib](#)
- [IceGrid::BoxedDistributionDescriptor::value](#)
- [IceGrid::ServerDescriptor::distrib](#)

Data Member Index

[icepatch](#) — The proxy of the IcePatch2 server.

[directories](#) — The source directories.

Data Members

string icepatch;

The proxy of the IcePatch2 server.

["java:type:java.util.LinkedList<String>"] [Ice::StringSeq](#) directories;

The source directories.
